location: Rockford, IL

2 out of 3 couples that seek medical intervention give birth
Houston IVF
www.houstonivf.net
Houston, TX

“Leaders in infertility care and research”
Reproductive Health Specialists, LTD.
Website: www.reproductivespecialist.com
Location: Joliet, Mokena, Aurora, Melrose Park (IL)
Our ethnically diverse registry is comprised of an extensive number of potential egg donors.

Genetic screening is also recommended, based on ethnic background.
“Screening Results and Accuracy: By combining the results of the ultrasound and blood test along with the age, race and weight of the mother, a number can be generated by computer which represents the risk of the pregnancy being affected by Down syndrome or another chromosome problem. Experience has shown that, together, the ultrasound and blood screen will identify approximately 90% of babies with chromosome abnormalities.”
